

A Study of Waves in Gaseous Plasmas

A Thesis

presented for the Degree of Doctor of Philosophy

by

Roderick William Boswell B.Sc.(Hons.) (Adelaide)

in the

School of Physical Sciences

The Flinders University of South Australia

July 1970

FLINDERS UNIVERSITY
LIBRARY

STATEMENT

I certify that this thesis does not incorporate without acknowledgement any material previously submitted for a degree or diploma in any University; and that to the best of my knowledge and belief it does not contain any material previously published or written by another person except where due reference is made in the text.

RL Boswell

ACKNOWLEDGEMENTS

I would like to thank my academic supervisor, Dr. E.L. Murray for his help. Special thanks are due to Professors H.A. Blevin and I.E. McCarthy for many useful discussions and a great deal of encouragement. Discussions with Dr. B. Davies about boundary conditions are gratefully acknowledged by the author.

I would also like to thank Mr. D.A. Atkinson, the Laboratory Manager at Flinders University, the technical staff at that University, and in particular, Mr. G.R. Read and Mr. G. Woods for their aid in the electronic aspects of this work.

Thanks are due to Mrs. Vivien Anson and Mrs. Marion Klemm for their aid in producing this thesis.

The work described in this thesis was carried out with a Commonwealth Post-graduate Scholarship.
